

Versatile dilution system for combustion and exhaust aerosol measurements

- ▶ Time: 3rd of November, 2020. 13.00 CEST (14.00 EEST)
- ▶ Duration: 1 hour
- ▶ Topics covered in the webinar
 - How to take aerosol samples from high temperatures and variable conditions
 - How to dilute combustion and exhaust aerosols in a controlled and repeatable way
 - Dekati® eDiluter™ series setups and capabilities
 - Aerosol dilution with different dilution factors
 - High temperature measurements from up to 1200 °C
- ▶ Joining instructions: The webinar is held on Zoom and it is free for all participants. Advanced registration is required. There are limited amount of spaces available for this event so reserve your space now by following the link below:

Webinar hosted by

Erkki Lamminen
Vice President, Sales and
Business Development
Dekati Ltd.

Who should attend?

Anyone interested combustion and/
or exhaust aerosol measurements
and latest advances in particle
measurement technology.
